§22–304.

In setting any standard for labeling and child resistant packaging of any dangerous household substance, the Secretary shall consider:

- (1) The nature and use of the dangerous household substance;
- (2) The reasonableness of the standard;
- (3) Available scientific and engineering information about child resistant packaging;
- (4) Available medical information about personal injury to and illness of children from accidental access to dangerous household substances; and
- (5) Manufacturing practices of industries affected by this subtitle.
